

Przemek Walczak

Przemek joined Chanticleer in 1996 as a Horticulturist. In addition to gardening, Przemek finds inspiration from nature for his garden art, typically expressed in metal, wood, and stone. His projects transform bridges, fences, pathways, walls, and railings, from utilitarian necessities to artistic expressions complementing their setting. He teaches classes on gardening with native plants, spring wildflowers and ephemerals, moss gardening, aquatic gardening, and woodland and shade gardening. Przemek graduated from Academy of Life Sciences in Warsaw, Poland with a Master of Economics and Agriculture.
